## **The Hygienic Shower Hose CX 360 Stops bacteria such as Legionella Extendable/Flexible: 115 – 150 cm**

Quality made in Germany

- Metal shower hose with a high-gloss chrome woven meshwork
- Elastic shower hose that is extendable from 115 – 150 cm
- Adequate replacement for your standard 150 cm shower hose
- The inner silicone hose is platinum-plated
- KTW-A/W270 certified
- Twist-swivel cone (Twist protection), 1 x counterpane nut
- ½ inch standard threat for all fittings and handheld showerheads
- TÜV, DIN EN 1113
- Extremely durable with a tensile load of 80 kg and a guarantee of 5 years

### **Why choose the CX 360?**

The insides of normal shower hoses have an extremely rough surface if viewed through a microscope. This is an ideal breeding place for bacteria. Within a matter of weeks the inside of the shower hose can be covered with dangerous bacteria creating a slimy and sticky film also known as a BIOFILM. This is the ideal environment for Legionella to breed. The CX 360 solves this dangerous problem. By using a special platinum mesh polymerisation procedure the inner surface of the hose is so smooth that bacteria can no longer stick on to the inside of the shower hose. Tests according to the German DVGW W270 have shown that even after a period of 6 months no Biofilm whatsoever was found in the CX 360 shower hose. Only shower hoses that pass the KTW-A/W270 standards are recommended for areas with high hygienic standards, such as hospitals, clinics, old people's homes and hotels.
